New SDRuno release will implement receiver diversity

> This weekend at Hamvention (Dayton, Ohio) Andy, Mike and Steve from SDRplay will be showing an early version of Diversity reception running in SDRuno with an RSPduo.
>
> The RSPduo gives users the ability to implement receiver diversity as it contains two independent tuners that are phase and time synchronous.

–From QRZ

I've been thinking about getting an RSPDuo for a while but this really makes me wanna get one! I should start thinking seriously about a receive HF antenna and a way too integrate this with my transceiver...
