VE7SCK Update

The VE7SCK 440 repeater information has been updated with the BC Amateur Radio Coordination Council and will show next time they update their site. I've also updated the tone to 100.0 Hz on the repeater itself so you'll need to change your radios accordingly:

VE7SCK	442.650 MHz	+5.000 MHz	T100.0 Hz

But the big news is that today, Bob and Patrick finished moving the repeater to the Roberts Creek Fire hall. See a few pictures in the photo album.
