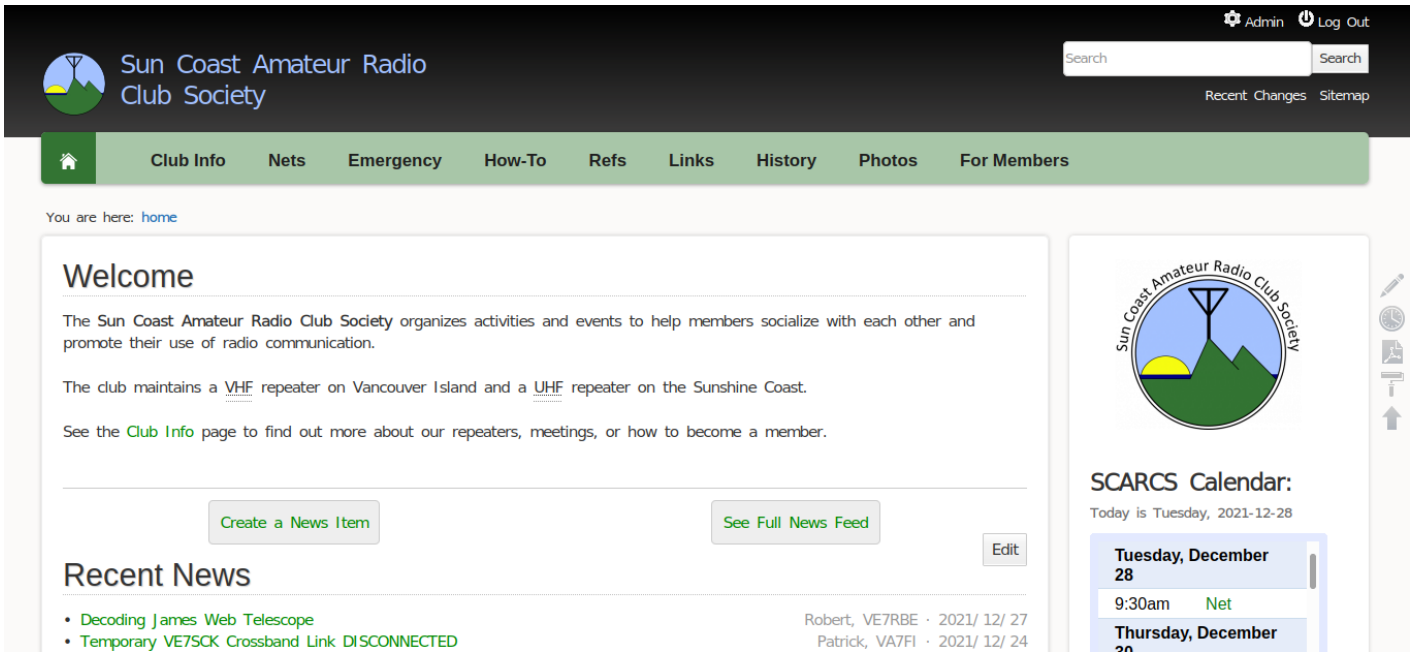
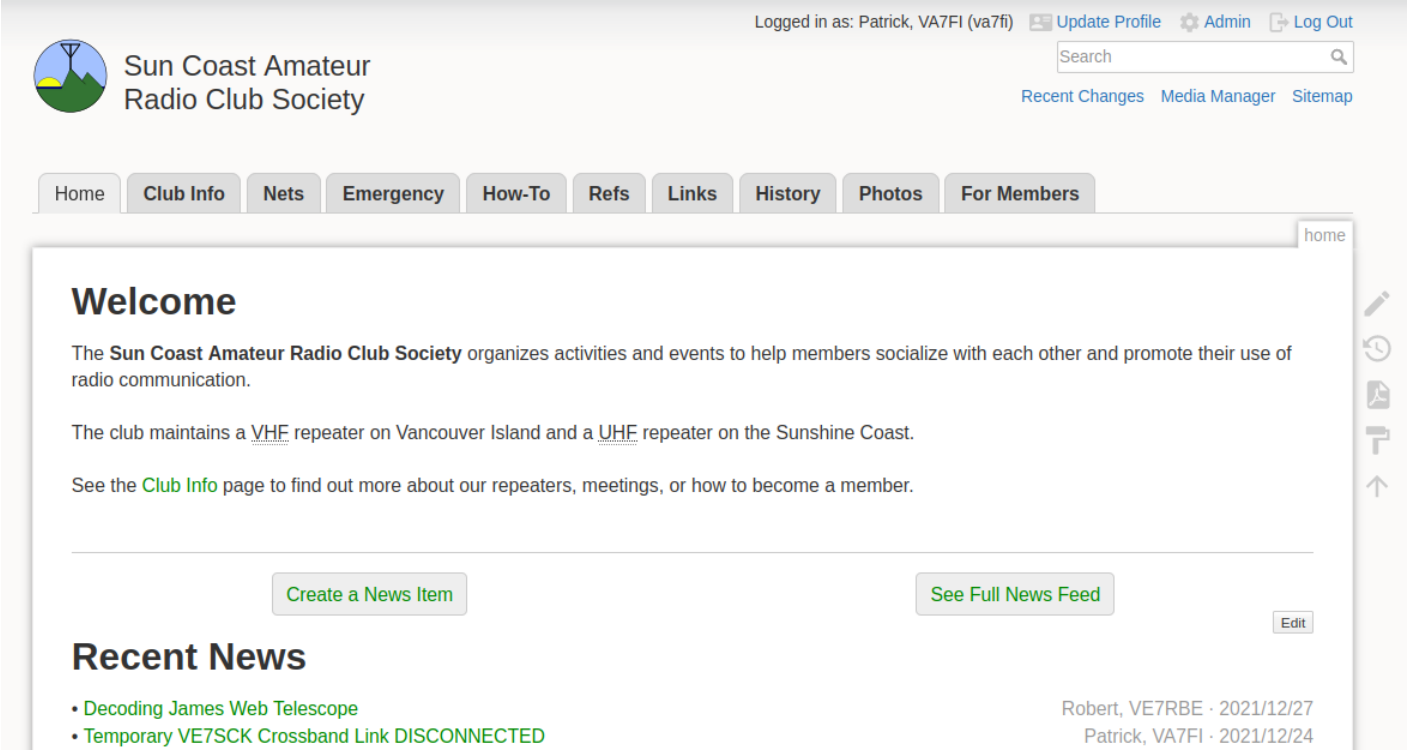
New Site Template

Unfortunately, it looks like the old 20Cones template we were using hasn't been updated since 2014 and it was starting to cause issues with some other parts of the website. Until I find a better template, I reverted back to the default with some customization.

The old tempate



The new template



The main differences

- The font is better on the new template
- But the top navigation bar doesn't collapse nicely on mobile devices.
- And the sidebar wasn't as good so I disabled it for now.

I'll continue trying to resolve these issues.
