25th World Scout Jamboree 2023 Korea

My son Joseph along with fellow Venturer Sea Scout Ben,Tony (Ben's Dad), Elliott VA7ETC and his wife Katherine are all attending the World Scout Jamboree in Saemangeum South Korea from August 1st to August 12th , representing the 6th Roberts Creek Scout Group 25th World Jamboree (they are presently there having pre-camp adventures). There will be a radio exhibit setup there, so I thought it would be nice to look up details on it for anyone who might want to work the stations there (I am definitely going to try to work them using digital modes of course).

So far I have found an off site station (located in the same city) 6K25WSJ.

I also found on the Korean Amateur Radio Relay League's site the callsign for everyone who has a license foreign or not to use at the exhibit there 25th World Scout Jamboree radio station operation information for foreign hams which uses **HL25WSJ** as the callsign, so far this callsign is not listed at QRZ but hopefully they will put it on there soon.

I will continue to update this document as I find new information, hopefully Elliott will get a chance to work the station while there and give us an update as well. Please feel free to edit this document if you run across anything else related to this event in regard to radio operation.
