

BC Wildfire App

The province of BC has put out a *BC Wildfire Service* beta app on Google Play.

So far, it looks pretty good.

<WRAP center align>

The map displays the geographical distribution of six fire centres in British Columbia, outlined in orange. The centres are: Northwest Fire Centre (northwest coast), Prince George Fire Centre (north-central interior), Cariboo Fire Centre (central interior), Coastal Fire Centre (southwest coast), Kamloops Fire Centre (eastern interior), and Southeast Fire Centre (southeastern interior). Major cities like Vancouver, Seattle, and Edmonton are marked. The map includes geographical features like the Pacific Ocean, Great Slave Lake, and the Peace and Columbia rivers. The interface includes a dark blue header with the BC Wildfire Service BETA logo and a hamburger menu icon. At the bottom, there are navigation icons for Layers, Near Me, Search, and More. Attribution text at the bottom of the map area reads: "Leaflet | Powered by Esri | Esri, HERE, Garmin, FAO, USGS, NOAA, ..."
