

N8XJK Super Booster

I recently purchased the [N8XJK Super Booster](#) and share my initial impressions.

Purchase Method

[West Mountain Radio](#) makes great product, but their shipping to Canada is pretty expensive. Here is what it would have cost to get the booster shipped here (in USD):

Shipping Method

United Parcel Service (1 pkg x 3 lbs total) 	
UPS Worldwide Expedited	\$102.93 <input checked="" type="radio"/>
UPS Saver	\$109.27 <input type="radio"/>
Customs/Duties/Taxes:	+\$13.00

ATTN CANADIAN CUSTOMERS!

For Canada only, the cost calculated during the order process includes shipping, brokerage, and all duties/taxes.

Thankfully, [GPS Central](#) in Alberta carries West Mountain Radio gear and sells it for pretty much the same price (after exchange rate):

	Booster	Shipping	Duty / Taxes	Total
WMR (in USD)	\$249.95	\$102.93	\$ 13.00	\$365.88
WMR (in CAD ¹⁾)	\$354.93	\$147.58	\$18.46	\$520.97
GPS Central	\$360	\$20.00	\$ 45.60	\$425.60

¹⁾

The Exchange Rate was 1.42 when I bought it
