

BCPSN Checkins

The latest upgrade of my [Net Roll Call Spreadsheet](#) has a tab that queries the [ISED Database](#). So tonight, I logged every Canadian station that I heard (or heard relayed) and looked at the distribution of qualifications of the people who checked in.

Out of 126 stations:

- 9% only have Basic (+ some Morse)
- 30% have 5WPM Basic with Honours (with or without Morse)
- 45% have 12WPM
- 60% have Advanced (with other qualifications)
