

New Tags

We upgraded our website over two years ago, and since then we've collected 172 posts (173 with this one).

I was doing a little maintenance on the site today and decided to add tags to our existing posts. In addition to the year and month tags we've been using, I added gear, software and fav (for favourite miscellaneous posts). The goal isn't to tag every single post, but to tag those that stay relevant and interesting over time.

- To see them, click on the [See Tagged Items](#) button on the front page:
- To add a tag, type the tag at the bottom of the blog post.
