

# Wiki Update Coming Soon

For the past month or so, some of you might have noticed this banner at the top of the wiki when you log in<sup>1)</sup>:

It indicates that a new update of the wiki engine is available. I had been waiting for the stable release to be available instead of the release candidate (rc) and it looks like it is now. I'm currently in the process of testing this upgrade on a local copy of our website to make sure that it doesn't break anything. The current version we're using is from 2020-07-29 (2 years ago!) so there could be incompatibilities with extensions we're using.

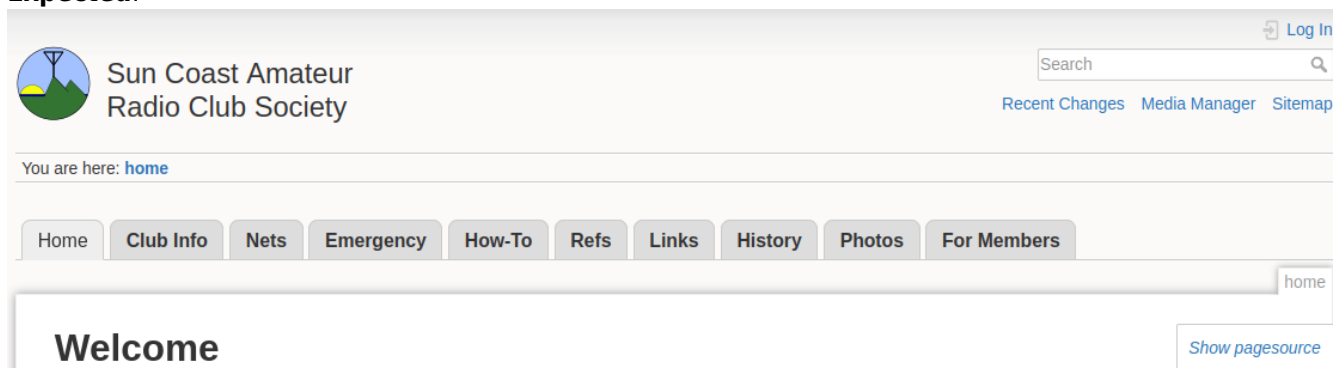

Once I'm satisfied that the new version is running well, I'll upgrade the site here as well.

## Issues

### Header Missing

The header is missing.

- **Expected:**

- **Actual:**

# BlogTNG Options Missing

The BlogTNG options used to post a news item on the front page are missing. Steps to recreate:

1. click on "Create a News Item" on the front page
2. Add a title and click "Create"

## • Expected

Edit the page (only if you can **improve** it) and hit **Save**. For help, see the [Syntax](#) page. If you want to test some things, use the [Playground](#) page.
