

# Wiki Update Coming Soon

For the past month or so, some of you might have noticed this banner at the top of the wiki when you log in<sup>1)</sup>:

It indicates that a new update of the wiki engine is available. I had been waiting for the stable release to be available instead of the release candidate (rc) and it looks like it is now. I'm currently in the process of testing this upgrade on a local copy of our website to make sure that it doesn't break anything. The current version we're using is from 2020-07-29 (2 years ago!) so there could be incompatibilities with extensions we're using.

Once I'm satisfied that the new version is running well, I'll upgrade the site here as well.

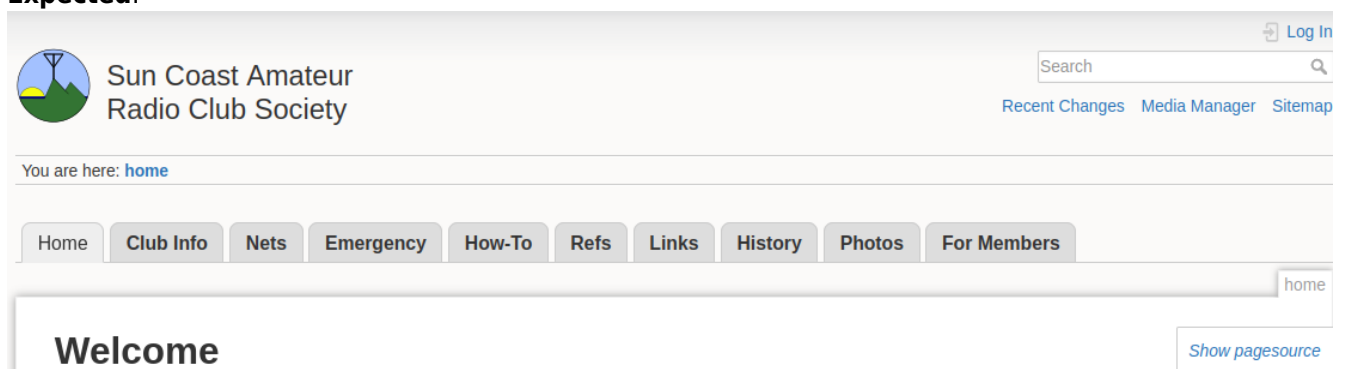

## Issues

I found some issues that will need to be fixed before I proceed with the wiki. I'll update this page as I make progress.

## Header Missing

The header is missing.

- **Expected:**

- **Actual:**

## Table of Contents Not Hiding

I had configured the table of content to hide by default. It looks like this configuration was overwritten by the upgrade.
