New IC-7760 Coming Soon

The new IC-7760 HF radio should be available soon.

One feature that sets it apart is that the control head can be connected to the RF Deck over the Local Area Network.

It's a 200W radio, which might explain why the voltage requirements are a bit unusual:

RF Deck	90 ~ 264 V AC
Control Head	15.0 V DC ±0.75 V (with BC-267A/E)

Both HRO and DX Engineering have it listed for $6299.95, with the latter advertising an estimated ship date of Jan 27, 2025.
