

Git

Test Scenario

- Create two files in a remote folder to simulate the wiki install on the server.
- Change their permissions and ownership to match what's on the server:

```
-rwxrwx--- 1 ptruchon www-data 26 Dec 26 10:20 file1.txt  
-rwxrwx--- 1 ptruchon www-data 26 Dec 26 10:20 file2.txt
```
