

Git

Test Scenario

- Create two files in a remote folder to simulate the wiki install on the server.
- Change their permissions and ownership to match what's on the server:

```
ptruchon@ThinkPad-T440:~/gittest/remotes$ ls -l
total 24
-rwxrwx--- 1 ptruchon www-data 26 Dec 26 10:20 file1.txt
-rwxrwx--- 1 ptruchon www-data 26 Dec 26 10:20 file2.txt
```

- Initialize git:

```
git init
git add .
git commit -m 'initial commit on remote'
git log
commit 0e5ccdedd1c9188996aadad3a8e2be5a319ab789 (HEAD -> master)
Author: Patrick Truchon <patoo@rbox.me>
Date:   Sun Dec 26 10:21:24 2021 -0800

    initial commit on remote
```
