

Azimuthal Map

Azimuthal maps are only useful if they are centred at your location. To create one:

- Go to <https://osm.org> and navigate to your location and zoom in as much as possible.
- Copy the last part of the URL. This contains your coordinates.

- Go to <https://ns6t.net/azimuth/azimuth.html>
- Paste the coordinates in the Location field and replace the \ between the two numbers with a comma: \

Request an Azimuthal Map

Title:

Location: ([help](#)) Label countries: ☒

Distance: ([help](#)) Label NA states: ☒

Paper: Label cities: ☐

Black & white: ☐ Blue background: ☒

Lat/long grid: ☐ View in browser: ☒

Label grids: ☐

Generating maps takes up to 30 seconds.

See [here](#) for more information about Azimuthal Maps.
