

Azimuthal Map

Azimuthal maps are only useful if they are centred at your location. To create one:

- Go to <https://osm.org>, navigate to your location and zoom in as much as possible.
- Copy your coordinates (the last part of the URL).

- Go to <https://ns6t.net/azimuth/azimuth.html>
- Paste the coordinates in the Location field and replace the \ between the two numbers with a comma: \ 

See [here](#) for more information about Azimuthal Maps.
