# Azimuthal Map

Azimuthal maps are only useful if they are centred at your location. To create one:

- Go to https://osm.org, navigate to your location and zoom in as much as possible.
- Copy your coordinates (the last part of the URL).

- Go to https://ns6t.net/azimuth/azimuth.html
- Paste the coordinates in the `Location` field and replace the `\` between the two numbers with a comma: \\

See here for more information about Azimuthal Maps.
