

# Net Logging Spreadsheet

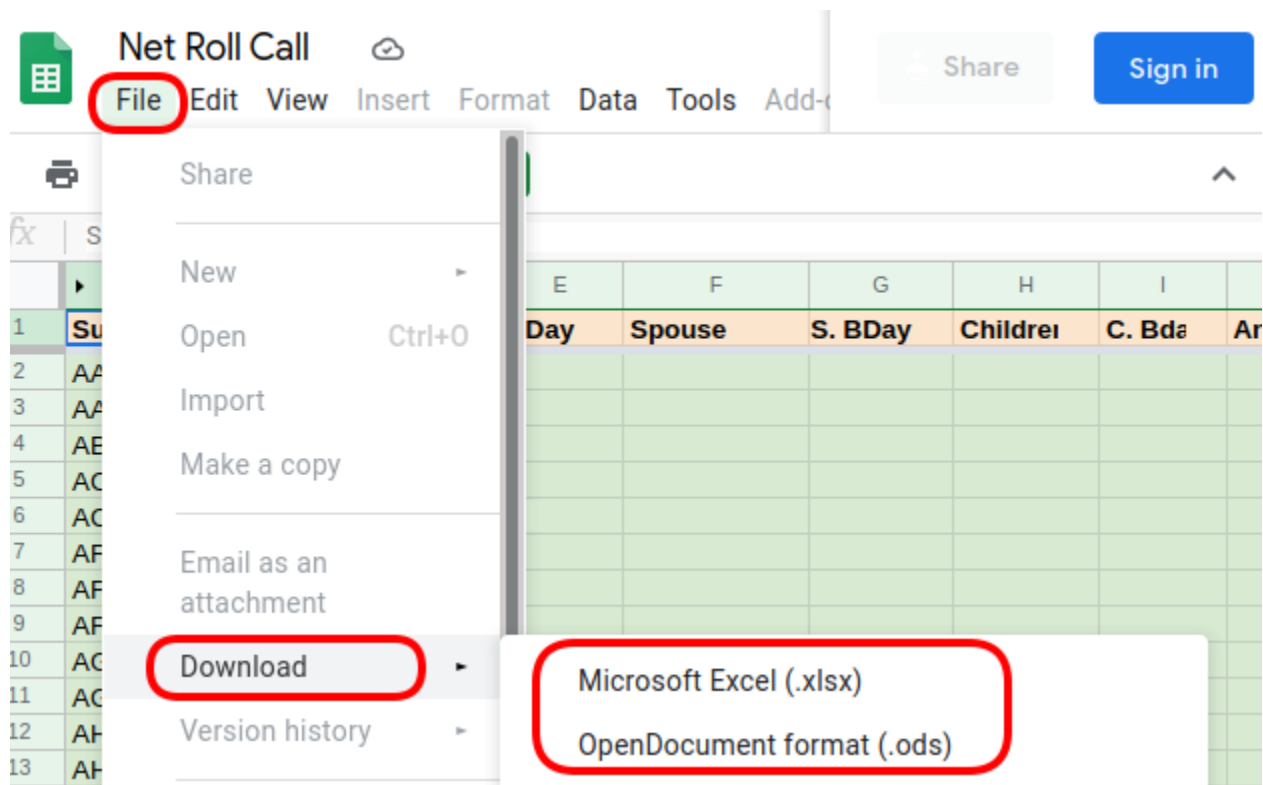

The spreadsheet cannot be used directly from the browser anymore as I was spending too much time fixing things. To use it, download the Excel or LibreOffice version for offline use.

Please submit additions or corrections to [Patrick, VA7FI](#) via email.

## Downloading The File

Currently, the file is not public, contact [Patrick, VA7FI](#) if you'd like access.

Once you have the link, you can download it as a Microsoft Excel file or as an OpenDocument File:

A few things to keep in mind:

- I haven't tested the Excel version as I don't have Microsoft Office, but the Free and Open Source office suite [LibreOffice](#) works on Windows, GNU/Linux, and OSX platforms.
- If you need to update the Data sheet, please update the **Online** version, not your local offline version. That way, other users will benefit from your updates.
- Discard and download a fresh copy every time you need it so as to always have the latest database.
- Please feel free to [contact me](#) if you have any questions or comments. I would appreciate some feedback about how the Excel version performs as I am not able to test it myself.

## Basic Idea

- The spreadsheet has a few tabs that can be selected at the bottom of the page:

<b>+</b>	Local Data	LogSheet (Local + ISED)	LogSheet (Local)	LogSheet (ISED)	Instructions	What's New
----------	------------	-------------------------	------------------	-----------------	--------------	------------

- Data contains the actual information about a few hundreds of hams.
- LiveLogSheet is the “search / log” page used during the net.
- Instructions links to this page and lists a few changes I've made.
- ISED is a hidden tab that contains over 80,000 entries from the [ISED](#) website.

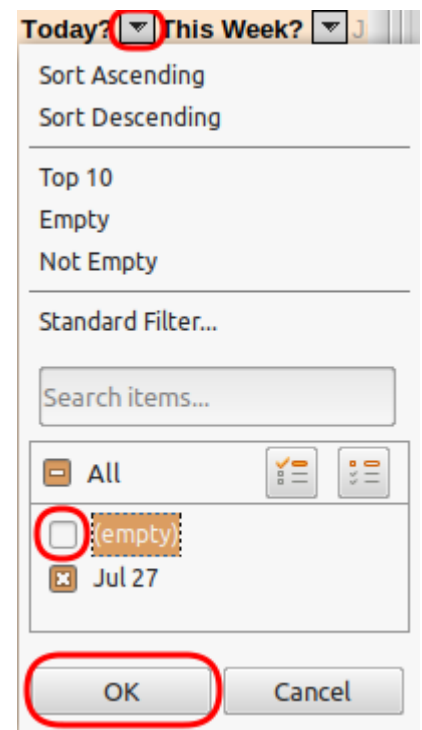

The most important thing is that **you can type in and delete cells in green**, but you should **not edit or delete cells in orange**.

## The Data Tab

Suffix	Prefi	Name	BDay	Spouse	S. BDay	Children	C. Bday	Anniversary	A. Day	QTH	Notes	Today?	This Week?
AA	VA7	Richard	JUL 27									Jul 27	Week 31
AAK	VE7	Windy	JUL 28										Week 31
ABL	VE7	Don											

The Data tab contains information about each ham operator and a few formulas to flag important dates. This sheet is **NOT** the sheet you'll be using during the net, it's a sort of “database”:

Column(s)	Edit	Details
Column A	✗	Is hidden and contains formulas that the other tab needs.
Columns B – M	✓	Contains information about ham operators.
Columns E, G, I, K	✓	Are dates that should be entered as so 'JAN 1. <sup>1)</sup>
Columns N – P	✗	Contains formulas and should NOT be edited.

To add a new entry, see the [Adding Names](#) section below.

## Birthdays and Anniversaries

To see who is having a birthday or anniversary, filter column N or O (but not both at the same time):

- Click on the upside-down triangle on the right of Today? in Column N or This Week? in Column O.
- Remove the check mark on the left of (empty).  
Under Microsoft Excel, it's called (Blanks).
- Press OK

This will show only the lines of people that have a birthday or anniversary on the day or week. Note the names and callsign of these people to acknowledge them during the preamble.

Once you've got that information, you can re-check the (empty) lines to unhide them.

## The LiveLogSheet Tab

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P
Checkins: 6				# of Birthdays or Anniversaries:				Today: 1		This week: 7					
Suffix	Prefix	Callsign	Dup?	Name	BDay	Spouse	S. BDay	Children	C. Bday	Anniversar	A. Day	QTH	Notes	Today?	#
aa		VA7AA		Richard	Sep 29							Chemainus		Sep 29	1
aa		VA7AA	y	Richard	Sep 29							Chemainus		Sep 29	1
jh		Prefix?													2
jh	ve7	ve7jh		Gabor								Crofton			2
jh	va7	va7jh		Jim								Campbell River			2
aaa		Prefix?													0
aaa	ve7	ve7aaa		Arthur Ellwood (ISED)								CAMPBELL RIVE			0
aaa	va7	va7aaa		Allan Stephen (ISED)								LANGLEY (ISED)			0
wek	ve7	ve7wek		Not Found											0

The LiveLogSheet tab is really the meat of this spreadsheet. During the net, all you need to do is type the suffix in Column A (**not** case sensitive).

- Column B can be left blank unless there are two callsigns with the same suffix (ex. VA7JH and VE7JH), or if the suffix is not in the Data tab at all (ex. "AAA"). If that's the case, Column C will ask you to add the prefix in Column B.
- Once Column C has the full callsign, it'll look up the information in the Data tab, and if not found there, it'll look in the ISED tab.
- Information from the ISED tab will have "(ISED)" written in the cells (ex. VE7AAA)
- If the callsign doesn't exist (ex. VE7WEK), the cells will be left blank.
- The cells in orange **should NOT be edited or deleted**.
- Cell D1 shows the total number of checkins.
- The top shows the number of Birthdays and Anniversaries.

When the net is done, simply delete what you typed in column A and B (**NOT what appeared in the other columns**)

Note that I made up Richard's (VA7AA) birthday for the sake of illustration.

1)

Dates must be formatted with three letters and be preceded by an apostrophe (') to force the proper formatting.
