

- If you want to add a brand new page or make bigger edits, check with [Patrick](#) first so we can plan it together.

- You can also add a **News Feed** item to our front page. Have a look at our current News Feed to see what type of posts are there. Anything ham related or of interest to our club can be posted there. The more from different people the better!

- All the changes made are tracked and archived by the wiki so don't be too worry about breaking something. If this happens, just let [Patrick](#) know and he'll be able to **reverse the changes** easily. You can also try to reverse the changes yourself if you want; it's not too hard.

Sync.com

We have a shared folder on Sync.com that allows members to access shared files.

- To create an account, use this [referral link](#), which will give both the club and you an extra 1GB of storage.
- Once your account is created, send [Patrick](#) an email to let him know and he'll share the club's folder with you. Also let him know which email address you've used for the Sync.com registration if it's different than the one you usually use.
- We also encourage you to [download and install](#) the computer program and the phone app. They make sharing files with the rest of the members really easy.

Once you have access to the Club's shared drive, keep this very important thing in mind: <box red 90%

|Important> Any edit or deletion you make will propagate to everyone's copy. Even moving a file out of the shared folder into a local folder will delete it from everyone else's shared folder. </box>

How-To

Finally, have a look at the ever expanding [How-To](#) section and feel free to add any new topic that is mildly ham related. We have a lot of collective knowledge and the more we share it, the better it is for everyone.

Since this can potentially be a big section, all new pages in this section should be within the How-To namespace. To do this, simply add /howto/ before the new page name. For example, the link to this page is /howto/newmembers.
