## **RAC Contests Log**

This year was my first time participating in the RAC Canada Day contest on my own. It was a lot of fun and also very instructive. Here are a few things I learned.

First, everything you need to know about the RAC contests (Canada Day or the Winter Day) is located on RAC website.

## Logs

At the end of the contest, logs must be submitted to RAC. They will accept paper logs for submissions with less than 100 entries, but they really prefer electronic logs, which must be formatted as Cabrillo.

A Cabrillo file is really just plain text file formatted in a very specific way. For more information, see:

- This RAC pdf
- The WWROF website

For example, here's a copy of my Cabrillo file (with only a few entries as example):

START-OF-LOG: 3.0 CREATED-BY: RAC Contests.ods v2020.07.04 by VA7FI
CALLSIGN: VA7FI
LOCATION: BC
CONTEST: RAC CANADA DAY

## END-OF-LOG:

The first 21 lines give RAC all the information they need about the operator. The other lines show the contacts made, ending with an END-OF-LOG tag.

RAC does NOT want this emailed to them in the body of the email. Instead, this should be saved in a plain text file named (in my case): VA7FI.LOG and attached to the email.

Regular contesters use logging programs which can generate these files while providing many bells and whistles during the contest to facilitate the logging process. Many people have recommended N1MM. RAC also has its own Contest Software.

But since I'm not a regular contester and I didn't have time to familiarize myself with a logging program that would run under GNU/Linux, I simply used a spreadsheet to log my entries and tweaked it as the day went on to add a few features like duplicate check and
