

Wrap Plugin Examples

The Wrap plugin has some of its most commonly used wraps in the tool bar:

[More info here](#)

Columns

<WRAP half column>

This is text in the left column.

<WRAP half column>

This is text in the right column.

Alignment

<WRAP rightalign>

All this text is aligned to the right.

<WRAP centeralign>

All this text is aligned in the centre.

<WRAP leftalign>

This text is aligned to the left as per usual.

<WRAP justify>

This text is justified, which means that the lines are stretched so that they all end at the end.

Boxes

<WRAP box 80%>

<WRAP round info box 80%>

Also note that the width can be set as:

<WRAP round box 80%>

<WRAP round help box 80%>

<WRAP round danger box 80%>

<WRAP round important box 80%>

%,
px,
em,
rem

<WRAP round warning box 80%>

<WRAP round alert box 80%>

,
ex,
ch,
vw,
vh,
pt,
pc,
cm,
mm,
in

<WRAP round caution box 80%>

<WRAP round tip box 80%>

<WRAP round notice box 80%>

<WRAP round todo box 80%>

<WRAP round safety box 80%>

<WRAP round download box 80%>

<WRAP prewrap 80%> is not technically a box, but it acts like one.

Misc

For embedded text, use wrap in lower case:

- <wrap tip>
- <wrap mark hi>
- <wrap mark lo>
- <**wrap mark em**>
- [redacted]
- <wrap indent>
- <wrap outdent>
- <wrap button>[[link]]**wrap**

Test

test

<WRAP box 80%>

A Heading

So here's a sample wrap containing what I hope to eventually be a nicely formatted, visually appealing bit of content.
