ThinkPad T440

Available at the beginning of October after I get my new computer. It's a good computer, but it's getting a bit old for Windows. I have a second one of these that runs Linux much more quickly. I'm happy to install [Linux Mint 21.2](#) on it if you'd like, but I won't be able to go back to Windows since I don't have the original CD.
